Accreditation is a system for recognizing educational institutions and professional programs affiliated with those institutions as having a level of performance, integrity, and quality that entitles them to the confidence of the educational community and the public they serve. The Commission on Accreditation (COA) of the Council on Social Work Education (CSWE) is recognized by the Council for Higher Education Authority to accredit baccalaureate and master's degree programs in social work education in the United States and its territories. The COA is responsible for formulating, promulgating, and implementing the accreditation standards for baccalaureate and master's degree programs in social work, for ensuring the standards define competent preparation, and for confirming that accredited social work programs meet the standards. To this end, CSWE's COA administers a multistep accreditation process that involves program self-studies and benchmarks, site visits, and COA reviews.

The accreditation review process provides professional judgments on the quality of a social work education program in an institution. These findings are based on applying the Educational Policy and Accreditation Standards (EPAS) promulgated by the Commission on Educational Policy (COEP) and the COA. The essential purpose of the accreditation process is to provide a professional judgment of the quality of the program offered and to encourage continual improvement. Moreover, systematic examination of compliance with established standards supports public confidence in the quality of professional social work education and in the competence of social work practice.

EPAS Revision Process

The COA and the COEP are responsible for revising the EPAS. The revision takes place in accordance with the CSWE bylaws, which mandate that the policy statement be reviewed by COEP "at periodic intervals not to exceed 7 years." CSWE's recognition by the Council for Higher Education Authority also requires that accreditors have a process whereby standards are reviewed periodically by the COA.

The most recent standards review process took more than 5 years and resulted in three drafts issued for public review and comment. The intent of the COA and the COEP was to solicit feedback from as many constituents as possible in as many ways as possible. The COEP and the COA would like to thank the programs, individuals, organizations, and communities of interest that provided feedback on all of the drafts.

The educational policy, which details the new social work competencies for the 2015 EPAS, was developed by COEP and approved by the CSWE Board of Directors on March 20, 2015. The accreditation standards were developed and approved by the COA on June 11, 2015. Programs that have reaffirmation reviews in October 2017 or later will use the 2015 EPAS to prepare their self-studies. Programs applying for candidacy in 2016 and beyond would use the 2015 EPAS for their benchmark documents.

For updated information about the 2015 EPAS, please visit www.cswe.org/Accreditation or send an e-mail to accreditation@cswe.org.

July 2015

PURPOSE: SOCIAL WORK PRACTICE, EDUCATION, AND EDUCATIONAL POLICY AND ACCREDITATION STANDARDS

The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social and economic justice, the prevention of conditions that limit human rights, the elimination of poverty, and the enhancement of the quality of life for all persons, locally and globally.

Social work educators serve the profession through their teaching, scholarship, and service. Social work education at the baccalaureate, master's, and doctoral levels shapes the profession's future through the education of competent professionals, the generation of knowledge, the promotion of evidence-informed practice through scientific inquiry, and the exercise of leadership within the professional community. Social work education is advanced by the scholarship of teaching and learning, and scientific inquiry into its multifaceted dimensions, processes, and outcomes.

The Council on Social Work Education (CSWE) uses the Educational Policy and Accreditation Standards (EPAS) to accredit baccalaureate and master's level social work programs. EPAS supports academic excellence by establishing thresholds for professional competence. It permits programs to use traditional and emerging models and methods of curriculum design by balancing requirements that promote comparable outcomes across programs with a level of flexibility that encourages programs to differentiate.

EPAS describe four features of an integrated curriculum design: (1) program mission and goals, (2) explicit curriculum, (3) implicit curriculum, and (4) assessment. The educational policy and the accreditation standards are conceptually linked to each other. Educational Policy describes each curriculum feature. Accreditation standards are derived from the Educational policy and specify the requirements used to develop and maintain an accredited social work program at the baccalaureate (B) or master's (M) level.

“

It permits programs to use traditional and emerging models and methods of curriculum design by balancing requirements that promote comparable outcomes across programs with a level of flexibility that encourages programs to differentiate.

COMPETENCY-BASED EDUCATION

In 2008 CSWE adopted a competency-based education framework for its EPAS. As in related health and human service professions, the policy moved from a model of curriculum design focused on content (what students should be taught) and structure (the format and organization of educational components) to one focused on student learning outcomes. A competency-based approach refers to identifying and assessing what students demonstrate in practice. In social work this approach involves assessing students' ability to demonstrate the competencies identified in the educational policy.

Competency-based education rests upon a shared view of the nature of competence in professional practice. Social work competence is the ability to integrate and apply social work knowledge, values, and skills to practice situations in a purposeful, intentional, and professional manner to promote human and community well-being. EPAS recognizes a holistic view of competence; that is, the demonstration of competence is informed by knowledge, values, skills, and cognitive and affective processes that include the social worker's critical thinking, affective reactions, and exercise of judgment in regard to unique practice situations. Overall professional competence is multi-dimensional and composed of interrelated competencies. An individual social worker's competence is seen as developmental and dynamic, changing over time in relation to continuous learning.

Competency-based education is an outcomes-oriented approach to curriculum design. The goal of the outcomes approach is to ensure that students are able to demonstrate the integration and application of the competencies in practice. In EPAS, social work practice competence consists of nine interrelated competencies and component behaviors that are comprised of knowledge, values, skills, and cognitive and affective processes.

Using a curriculum design that begins with the outcomes, expressed as the expected competencies, programs develop the substantive content, pedagogical approach, and educational activities that provide learning opportunities for students to demonstrate the competencies.

Assessment of student learning outcomes is an essential component of competency-based education. Assessment provides evidence that students have demonstrated the level of competence necessary to enter professional practice, which in turn shows programs are successful in achieving their goals. Assessment information is used to improve the educational program and the methods used to assess student learning outcomes.

Programs assess students' demonstration of competence. The assessment methods used by programs gather data that serve as evidence of student learning outcomes and the demonstration of competence. Understanding social work practice is complex and multi-dimensional, the assessment methods used by programs and the data collected may vary by context.

Social work competence is the ability to integrate and apply social work knowledge, values, and skills to practice situations in a purposeful, intentional, and professional manner to promote human and community well-being.

The nine Social Work Competencies are listed below. Programs may add competencies that are consistent with their mission and goals and respond to their context. Each competency describes the knowledge, values, skills, and cognitive and affective processes that comprise the competency at the generalist level of practice, followed by a set of behaviors that integrate these components. These behaviors represent observable components of the competencies, while the preceding statements represent the underlying content and processes that inform the behaviors.

Competency 1: Demonstrate Ethical and Professional Behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession's history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:

- make ethical decisions by applying the standards of the NASW Code of Ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
- use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
- demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
- use technology ethically and appropriately to facilitate practice outcomes; and
- use supervision and consultation to guide professional judgment and behavior.

Competency 2: Engage Diversity and Difference in Practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture's structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- present themselves as learners and engage clients and constituencies as experts of their own experiences; and
- apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

Competency 1: Demonstrate Ethical and Professional Behavior

Competency 2: Engage Diversity and Difference in Practice

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Competency 4: Engage In Practice-informed Research and Research-informed Practice

Competency 5: Engage in Policy Practice

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

- apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and system levels; and
- engage in practices that advance social, economic, and environmental justice.

Competency 4: Engage In Practice-informed Research and Research-informed Practice

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- use practice experience and theory to inform scientific inquiry and research;
- apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings; and
- use and translate research evidence to inform and improve practice, policy, and service delivery.

Competency 5: Engage in Policy Practice

Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:

- Identify social policy at the local, state, and federal level that impacts well-being, service delivery, and access to social services;
- assess how social welfare and economic policies impact the delivery of and access to social services;
- apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness.

Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:

- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies; and
- use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:

- collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies; and
- select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:

- critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies; and
- facilitate effective transitions and endings that advance mutually agreed-on goals.

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:

- select and use appropriate methods for evaluation of outcomes;
- apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
- critically analyze, monitor, and evaluate intervention and program processes and outcomes; and
- apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

PROGRAM MISSION AND GOALS

Educational Policy 1.0—Program Mission and Goals

The mission and goals of each social work program address the profession's purpose, are grounded in core professional values, and are informed by program context.

Values

Service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry are among the core values of social work. These values underpin the explicit and implicit curriculum and frame the profession's commitment to respect for all people and the quest for social and economic justice.

Program Context

Context encompasses the mission of the institution in which the program is located and the needs and opportunities associated with the setting and program options. Programs are further influenced by their practice communities, which are informed by their historical, political, economic, environmental, social, cultural, demographic, local, regional, and global contexts and by the ways they elect to engage these factors. Additional factors include new knowledge, technology, and ideas that may have a bearing on contemporary and future social work education, practice, and research.

Accreditation Standard 1.0—Program Mission and Goals

- 1.0.1** The program submits its mission statement and explains how it is consistent with the profession's purpose and values.
- 1.0.2** The program explains how its mission is consistent with the institutional mission and the program's context across all program options.
- 1.0.3** The program identifies its goals and demonstrates how they are derived from the program's mission.

Service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry are among the core values of social work.

The explicit curriculum constitutes the program's formal educational structure and includes the courses and field education used for each of its program options. Social work education is grounded in the liberal arts, which provide the intellectual basis for the professional curriculum and inform its design. Using a competency-based education framework, the explicit curriculum prepares students for professional practice at the baccalaureate and master's levels. Baccalaureate programs prepare students for generalist practice. Master's programs prepare students for generalist practice and specialized practice. The explicit curriculum, including field education, may include forms of technology as a component of the curriculum.

Educational Policy 2.0—Generalist Practice

Generalist practice is grounded in the liberal arts and the person-in-environment framework. To promote human and social well-being, generalist practitioners use a range of prevention and intervention methods in their practice with diverse individuals, families, groups, organizations, and communities based on scientific inquiry and best practices. The generalist practitioner identifies with the social work profession and applies ethical principles and critical thinking in practice at the micro, mezzo, and macro levels. Generalist practitioners engage diversity in their practice and advocate for human rights and social and economic justice. They recognize, support, and build on the strengths and resiliency of all human beings. They engage in research-informed practice and are proactive in responding to the impact of context on professional practice.

The baccalaureate program in social work prepares students for generalist practice. The descriptions of the nine Social Work Competencies presented in the EPAS identify the knowledge, values, skills, cognitive and affective processes, and behaviors associated with competence at the generalist level of practice.

Accreditation Standard B2.0—Generalist Practice

- B2.0.1** The program explains how its mission and goals are consistent with generalist practice as defined in EP 2.0.
- B2.0.2** The program provides a rationale for its formal curriculum design demonstrating how it is used to develop a coherent and integrated curriculum for both classroom and field.
- B2.0.3** The program provides a matrix that illustrates how its curriculum content implements the nine required social work competencies and any additional competencies added by the program.

Accreditation Standard M2.0—Generalist Practice

- M2.0.1** The program explains how its mission and goals are consistent with generalist practice as defined in EP 2.0.
- M2.0.2** The program provides a rationale for its formal curriculum design for generalist practice demonstrating how it is used to develop a coherent and integrated curriculum for both classroom and field.
- M2.0.3** The program provides a matrix that illustrates how its generalist practice content implements the nine required social work competencies and any additional competencies added by the program.

Educational Policy M2.1—Specialized Practice

Specialized practice builds on generalist practice as described in EP 2.0, adapting and extending the Social Work Competencies for practice with a specific population, problem area, method of intervention, perspective or approach to practice. Specialized practice augments and extends social work knowledge, values, and skills to engage, assess, intervene, and evaluate within an area of specialization. Specialized practitioners advocate with and on behalf of clients and constituencies in their area of specialized practice. Specialized practitioners synthesize and employ a broad range of interdisciplinary and multidisciplinary knowledge and skills based on scientific inquiry and best practices, and consistent with social work values. Specialized practitioners engage in and conduct research to inform and improve practice, policy, and service delivery.

The master's program in social work prepares students for specialized practice. Programs identify the specialized knowledge, values, skills, cognitive and affective processes, and behaviors that extend and enhance the nine Social Work Competencies and prepare students for practice in the area of specialization.

Accreditation Standard M2.1—Specialized Practice

- M2.1.1** The program identifies its area(s) of specialized practice (EP M2.1), and demonstrates how it builds on generalist practice.
- M2.1.2** The program provides a rationale for its formal curriculum design for specialized practice demonstrating how the design is used to develop a coherent and integrated curriculum for both classroom and field.
- M2.1.3** The program describes how its area(s) of specialized practice extend and enhance the nine Social Work Competencies (and any additional competencies developed by the program) to prepare students for practice in the area(s) of specialization.
- M2.1.4** For each area of specialized practice, the program provides a matrix that illustrates how its curriculum content implements the nine required social work competencies and any additional competencies added by the program.

Educational Policy 2.2—Signature Pedagogy: Field Education

Signature pedagogies are elements of instruction and of socialization that teach future practitioners the fundamental dimensions of professional work in their discipline—to think, to perform, and to act ethically and with integrity. Field education is the signature pedagogy for social work. The intent of field education is to integrate the theoretical and conceptual contribution of the classroom with the practical world of the practice setting. It is a basic precept of social work education that the two interrelated components of curriculum—classroom and field—are of equal importance within the curriculum, and each contributes to the development of the requisite competencies of professional practice. Field education is systematically designed, supervised, coordinated, and evaluated based on criteria by which students demonstrate the Social Work Competencies. Field education may integrate forms of technology as a component of the program.

Accreditation Standard 2.2—Field Education

- 2.2.1** The program explains how its field education program connects the theoretical and conceptual contributions of the classroom and field settings.
- B2.2.2** The program explains how its field education program provides generalist practice opportunities for students to demonstrate social work competencies with individuals, families, groups, organizations, and communities and illustrates how this is accomplished in field settings.
- M2.2.2** The program explains how its field education program provides generalist practice opportunities for students to demonstrate social work competencies with individuals, families, groups, organizations, and communities and illustrates how this is accomplished in field settings.
- M2.2.3** The program explains how its field education program provides specialized practice opportunities for students to demonstrate social work competencies within an area of specialized practice and illustrates how this is accomplished in field settings.
- 2.2.4** The program explains how students across all program options in its field education program demonstrate social work competencies through in-person contact with clients and constituencies.
- 2.2.5** The program describes how its field education program provides a minimum of 400 hours of field education for baccalaureate programs and a minimum of 900 hours for master's programs.
- 2.2.6** The program provides its criteria for admission into field education and explains how its field education program admits only those students who have met the program's specified criteria.
- 2.2.7** The program describes how its field education program specifies policies, criteria, and procedures for selecting field settings; placing and monitoring students; supporting student safety; and evaluating student learning and field setting effectiveness congruent with the social work competencies.
- 2.2.8** The program describes how its field education program maintains contact with field settings across all program options. The program explains how on-site contact or other methods are used to monitor student learning and field setting effectiveness.
- B2.2.9** The program describes how its field education program specifies the credentials and practice experience of its field instructors necessary to design field learning opportunities for students to demonstrate program social work competencies. Field instructors for baccalaureate students hold a baccalaureate or master's degree in social work from a CSWE-accredited program and have 2 years post-social work degree practice experience in social work. For cases in which a field instructor does not hold a CSWE-accredited social work degree or does not have the required experience, the program assumes responsibility for reinforcing a social work perspective and describes how this is accomplished.
- M2.2.9** The program describes how its field education program specifies the credentials and practice experience of its field instructors necessary to design field learning opportunities for students to demonstrate program social work competencies. Field instructors for master's students hold a master's degree in social work from a CSWE-accredited program and have 2 years post-master's social work practice experience. For cases in which a field instructor does not hold a CSWE-accredited social work degree or does not have the required experience, the program assumes responsibility for reinforcing a social work perspective and describes how this is accomplished.
- 2.2.10** The program describes how its field education program provides orientation, field instruction training, and continuing dialog with field education settings and field instructors.
- 2.2.11** The program describes how its field education program develops policies regarding field placements in an organization in which the student is also employed. To ensure the role of student as learner, student assignments and field education supervision are not the same as those of the student's employment.

The implicit curriculum refers to the learning environment in which the explicit curriculum is presented. It is composed of the following elements: the program's commitment to diversity; admissions policies and procedures; advisement, retention, and termination policies; student participation in governance; faculty; administrative structure; and resources. The implicit curriculum is manifested through policies that are fair and transparent in substance and implementation, the qualifications of the faculty, and the adequacy and fair distribution of resources. The culture of human interchange; the spirit of inquiry; the support for difference and diversity; and the values and priorities in the educational environment, including the field setting, inform the student's learning and development. The implicit curriculum is as important as the explicit curriculum in shaping the professional character and competence of the program's graduates. Heightened awareness of the importance of the implicit curriculum promotes an educational culture that is congruent with the values of the profession and the mission, goals, and context of the program.

Educational Policy 3.0—Diversity

The program's expectation for diversity is reflected in its learning environment, which provides the context through which students learn about differences, to value and respect diversity, and develop a commitment to cultural humility. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. The learning environment consists of the program's institutional setting; selection of field education settings and their clientele; composition of program advisory or field committees; educational and social resources; resource allocation; program leadership; speaker series, seminars, and special programs; support groups; research and other initiatives; and the demographic make-up of its faculty, staff, and student body.

Accreditation Standard 3.0—Diversity

- 3.0.1** The program describes the specific and continuous efforts it makes to provide a learning environment that models affirmation and respect for diversity and difference.
- 3.0.2** The program explains how these efforts provide a supportive and inclusive learning environment.
- 3.0.3** The program describes specific plans to continually improve the learning environment to affirm and support persons with diverse identities.

Educational Policy 3.1—Student Development

Educational preparation and commitment to the profession are essential qualities in the admission and development of students for professional practice. Student participation in formulating and modifying policies affecting academic and student affairs are important for students' professional development.

To promote the social work education continuum, graduates of baccalaureate social work programs admitted to master's social work programs are presented with an articulated pathway toward specialized practice.

Accreditation Standard 3.1—Student Development: Admissions; Advisement, Retention, and Termination; and Student Participation

Admissions

- B3.1.1** The program identifies the criteria it uses for admission to the social work program.
- M3.1.1** The program identifies the criteria it uses for admission to the social work program. The criteria for admission to the master's program must include an earned baccalaureate degree from a college or university accredited by a recognized regional accrediting association. Baccalaureate social work graduates entering master's social work programs are not to repeat what has been achieved in their baccalaureate social work programs.
- 3.1.2** The program describes the policies and procedures for evaluating applications and notifying applicants of the decision and any contingent conditions associated with admission.
- M3.1.3** The program describes the policies and procedures used for awarding advanced standing. The program indicates that advanced standing is awarded only to graduates holding degrees from baccalaureate social work programs accredited by CSWE, recognized through its International Social Work Degree Recognition and Evaluation Services,* or covered under a memorandum of understanding with international social work accreditors.
- 3.1.4** The program describes its policies and procedures concerning the transfer of credits.
- 3.1.5** The program submits its written policy indicating that it does not grant social work course credit for life experience or previous work experience. The program documents how it informs applicants and other constituents of this policy.

Advisement, retention, and termination

- 3.1.6** The program describes its academic and professional advising policies and procedures. Professional advising is provided by social work program faculty, staff, or both.
- 3.1.7** The program submits its policies and procedures for evaluating student's academic and professional performance, including grievance policies and procedures. The program describes how it informs students of its criteria for evaluating their academic and professional performance and its policies and procedures for grievance.
- 3.1.8** The program submits its policies and procedures for terminating a student's enrollment in the social work program for reasons of academic and professional performance. The program describes how it informs students of these policies and procedures.

Student participation

- 3.1.9** The program submits its policies and procedures specifying students' rights and opportunities to participate in formulating and modifying policies affecting academic and student affairs.
- 3.1.10** The program describes how it provides opportunities and encourages students to organize in their interests.

* This and all future references to degrees from social work programs accredited by CSWE, include degrees from CSWE-accredited programs or recognized through CSWE's International Social Work Degree Recognition and Evaluation Service, or covered under a memorandum of understanding with international social work accreditors.

Educational Policy 3.2—Faculty

Faculty qualifications, including experience related to the Social Work Competencies, an appropriate student-faculty ratio, and sufficient faculty to carry out a program's mission and goals, are essential for developing an educational environment that promotes, emulates, and teaches students the knowledge, values, and skills expected of professional social workers. Through their teaching, research, scholarship, and service—as well as their interactions with one another, administration, students, and community—the program's faculty models the behavior and values expected of professional social workers. Programs demonstrate that faculty is qualified to teach the courses to which they are assigned.

Accreditation Standard 3.2—Faculty

- 3.2.1** The program identifies each full- and part-time social work faculty member and discusses his or her qualifications, competence, expertise in social work education and practice, and years of service to the program.
- 3.2.2** The program documents that faculty who teach social work practice courses have a master's degree in social work from a CSWE-accredited program and at least 2 years of post-master's social work degree practice experience.
- 3.2.3** The program documents a full-time equivalent faculty-to-student ratio not greater than 1:25 for baccalaureate programs and not greater than 1:12 for master's programs and explains how this ratio is calculated. In addition, the program explains how faculty size is commensurate with the number and type of curricular offerings in class and field; number of program options; class size; number of students; advising; and the faculty's teaching, scholarly, and service responsibilities.
- B3.2.4** The baccalaureate social work program identifies no fewer than two full-time faculty assigned to the baccalaureate program, with full-time appointment in social work, and whose principal assignment is to the baccalaureate program. The majority of the total full-time baccalaureate social work program faculty has a master's degree in social work from a CSWE-accredited program, with a doctoral degree preferred.
- M3.2.4** The master's social work program identifies no fewer than six full-time faculty with master's degrees in social work from a CSWE-accredited program and whose principal assignment is to the master's program. The majority of the full-time master's social work program faculty has a master's degree in social work and a doctoral degree, preferably in social work.
- 3.2.5** The program describes its faculty workload policy and discusses how the policy supports the achievement of institutional priorities and the program's mission and goals.
- 3.2.6** Faculty demonstrate ongoing professional development as teachers, scholars, and practitioners through dissemination of research and scholarship, exchanges with external constituencies such as practitioners and agencies, and through other professionally relevant creative activities that support the achievement of institutional priorities and the program's mission and goals.
- 3.2.7** The program demonstrates how its faculty models the behavior and values of the profession in the program's educational environment.

Educational Policy 3.3—Administrative and Governance Structure

Social work faculty and administrators, based on their education, knowledge, and skills, are best suited to make decisions regarding the delivery of social work education. Faculty and administrators exercise autonomy in designing an administrative and leadership structure, developing curriculum, and formulating and implementing policies that support the education of competent social workers. The administrative structure is sufficient to carry out the program's mission and goals. In recognition of the importance of field education as the signature pedagogy, programs must provide an administrative structure and adequate resources for systematically designing, supervising, coordinating, and evaluating field education across all program options.

Accreditation Standard 3.3—Administrative Structure

- 3.3.1** The program describes its administrative structure and shows how it provides the necessary autonomy to achieve the program's mission and goals.
- 3.3.2** The program describes how the social work faculty has responsibility for defining program curriculum consistent with the Educational Policy and Accreditation Standards and the institution's policies.
- 3.3.3** The program describes how the administration and faculty of the social work program participate in formulating and implementing policies related to the recruitment, hiring, retention, promotion, and tenure of program personnel.
- 3.3.4** The program identifies the social work program director. Institutions with accredited baccalaureate and master's programs appoint a separate director for each.
 - B3.3.4(a)** The program describes the baccalaureate program director's leadership ability through teaching, scholarship, curriculum development, administrative experience, and other academic and professional activities in social work. The program documents that the director has a master's degree in social work from a CSWE-accredited program with a doctoral degree in social work preferred.
 - B3.3.4(b)** The program provides documentation that the director has a full-time appointment to the social work baccalaureate program.
 - B3.3.4(c)** The program describes the procedures for calculating the program director's assigned time to provide educational and administrative leadership to the program. To carry out the administrative functions specific to responsibilities of the social work program, a minimum of 25% assigned time is required at the baccalaureate level. The program discusses that this time is sufficient.
 - M3.3.4(a)** The program describes the master's program director's leadership ability through teaching, scholarship, curriculum development, administrative experience, and other academic and professional activities in social work. The program documents that the director has a master's degree in social work from a CSWE-accredited program. In addition, it is preferred that the master's program director have a doctoral degree, preferably in social work.
 - M3.3.4(b)** The program provides documentation that the director has a full-time appointment to the social work master's program.
 - M3.3.4(c)** The program describes the procedures for determining the program director's assigned time to provide educational and administrative leadership to the program. To carry out the administrative functions specific to responsibilities of the social work program, a minimum of 50% assigned time is required at the master's level. The program demonstrates this time is sufficient.

- 3.3.5** The program identifies the field education director.
- 3.3.5(a)** The program describes the field director's ability to provide leadership in the field education program through practice experience, field instruction experience, and administrative and other relevant academic and professional activities in social work.
 - B3.3.5(b)** The program documents that the field education director has a master's degree in social work from a CSWE-accredited program and at least 2 years of post-baccalaureate or post-master's social work degree practice experience.
 - M3.3.5(b)** The program documents that the field education director has a master's degree in social work from a CSWE-accredited program and at least 2 years of post-master's social work degree practice experience.
 - B3.3.5(c)** The program describes the procedures for calculating the field director's assigned time to provide educational and administrative leadership for field education. To carry out the administrative functions of the field education program, at least 25% assigned time is required for baccalaureate programs. The program demonstrates this time is sufficient.
 - M3.3.5(c)** The program describes the procedures for calculating the field director's assigned time to provide educational and administrative leadership for field education. To carry out the administrative functions of the field education program at least 50% assigned time is required for master's programs. The program demonstrates this time is sufficient.
 - 3.3.6** The program describes its administrative structure for field education and explains how its resources (personnel, time and technological support) are sufficient to administer its field education program to meet its mission and goals.

Educational Policy 3.4—Resources

Adequate resources are fundamental to creating, maintaining, and improving an educational environment that supports the development of competent social work practitioners. Social work programs have the necessary resources to carry out the program's mission and goals and to support learning and professionalization of students and program improvement.

Accreditation Standard 3.4—Resources

- 3.4.1** The program describes the procedures for budget development and administration it uses to achieve its mission and goals. The program submits a completed budget form and explains how its financial resources are sufficient and stable to achieve its mission and goals.
- 3.4.2** The program describes how it uses resources to address challenges and continuously improve the program.
- 3.4.3** The program demonstrates that it has sufficient support staff, other personnel, and technological resources to support all of its educational activities, mission and goals.
- 3.4.4** The program submits a library report that demonstrates access to social work and other informational and educational resources necessary for achieving its mission and goals.
- 3.4.5** The program describes and demonstrates sufficient office and classroom space and/or computer-mediated access to achieve its mission and goals.
- 3.4.6** The program describes, for each program option, the availability of and access to assistive technology, including materials in alternative formats.

Educational Policy 4.0—Assessment of Student Learning Outcomes

Assessment is an integral component of competency-based education. Assessment involves the systematic gathering of data about student performance of Social Work Competencies at both the generalist and specialized levels of practice.

Competence is perceived as holistic, involving both performance and the knowledge, values, critical thinking, affective reactions, and exercise of judgment that inform performance. Assessment therefore must be multi-dimensional and integrated to capture the demonstration of the competencies and the quality of internal processing informing the performance of the competencies. Assessment is best done while students are engaged in practice tasks or activities that approximate social work practice as closely as possible. Practice often requires the performance of multiple competencies simultaneously; therefore, assessment of those competencies may optimally be carried out at the same time.

Programs assess students' demonstration of the Social Work Competencies through the use of multi-dimensional assessment methods. Assessment methods are developed to gather data that serve as evidence of student learning outcomes and the demonstration of competence. Understanding social work practice is complex and multi-dimensional, the assessment methods used and the data collected may vary by context.

Assessment information is used to guide student learning, assess student outcomes, assess and improve effectiveness of the curriculum, and strengthen the assessment methods used.

Assessment also involves gathering data regarding the implicit curriculum, which may include but is not limited to an assessment of diversity, student development, faculty, administrative and governance structure, and resources. Data from assessment continuously inform and promote change in the explicit curriculum and the implicit curriculum to enhance attainment of Social Work Competencies.

Accreditation Standard 4.0—Assessment

- 4.0.1** The program presents its plan for ongoing assessment of student outcomes for all identified competencies in the generalist level of practice (baccalaureate social work programs) and the generalist and specialized levels of practice (master's social work programs). Assessment of competence is done by program designated faculty or field personnel. The plan includes:
- A description of the assessment procedures that detail when, where, and how each competency is assessed for each program option.
 - At least two measures assess each competency. One of the assessment measures is based on demonstration of the competency in real or simulated practice situations.
 - An explanation of how the assessment plan measures multiple dimensions of each competency, as described in EP 4.0.
 - Benchmarks for each competency, a rationale for each benchmark, and a description of how it is determined that students' performance meets the benchmark.
 - An explanation of how the program determines the percentage of students achieving the benchmark.
 - Copies of all assessment measures used to assess all identified competencies.
- 4.0.2** The program provides its most recent year of summary data and outcomes for the assessment of each of the identified competencies, specifying the percentage of students achieving program benchmarks for each program option.
- 4.0.3** The program uses Form AS 4(B) and/or Form AS 4(M) to report its most recent assessment outcomes for each program option to constituents and the public on its website and routinely up-dates (minimally every 2 years) its findings.
- 4.0.4** The program describes the process used to evaluate outcomes and their implications for program renewal across program options. It discusses specific changes it has made in the program based on these assessment outcomes with clear links to the data.
- 4.0.5** For each program option, the program provides its plan and summary data for the assessment of the implicit curriculum as defined in EP 4.0 from program defined stakeholders. The program discusses implications for program renewal and specific changes it has made based on these assessment outcomes.

APPENDIX: 2015 EPAS GLOSSARY

The 2015 EPAS glossary was developed by a subcommittee of the Commission on Educational Policy and the Commission on Accreditation and approved by each commission in February 2016. The glossary is an aid to understanding the EPAS and is not considered part of the educational policy or accreditation standards.

Educational Policy Terms

The following definitions were developed for use in the context of the 2015 educational policy:

Accreditation

A system for recognizing educational institutions and professional programs affiliated with those institutions for a level of performance and integrity based on review against a specific set of published criteria or standards. The process includes (1) the submission of a self-study document that demonstrates how standards are being met; (2) an onsite review by a selected group of peers; and (3) a decision by an independent board or commission that either grants or denies accredited status on the basis of how well the standards are met.

Behaviors

Observable actions that demonstrate an integration of knowledge, values, skills, and cognitive and affective processes.

Classroom

The organization of instruction including various face-to-face and/or e-learning methods of instruction.

Clients and constituencies

Those served by social workers including individuals, families, groups, organizations, and communities.

Cognitive and affective processes (includes critical thinking, affective reactions, and exercise of judgment)

- Critical thinking is an intellectual, disciplined process of conceptualizing, analyzing, evaluating, and synthesizing multiple sources of information generated by observation, reflection and reasoning.
- Affective reactions refer to the way in which our emotions influence our thinking and subsequently our behavior.
- Exercise of judgment is the capacity to perceive and discern multiple sources to form an opinion.

Competency-based education framework

A framework where the focus is on the assessment of student learning outcomes (assessing students' ability to demonstrate the competencies identified in the educational policy) rather than on the assessment of inputs (such as coursework and resources available to students).

Curriculum design

Curriculum design identifies the elements of the curriculum and states their relationships to each other. A design needs to be supported with a curriculum rationale to establish the means for competency attainment within the organization in which it operates.

Environmental justice

Environmental justice occurs when all people equally experience high levels of environmental protection and no group or community is excluded from the environmental policy decision-making process, nor is affected by a disproportionate impact from environmental hazards. Environmental justice affirms the ecological unity and the interdependence of all species, respect for cultural and biological diversity, and the right to be free from ecological destruction. This includes responsible use of ecological resources, including the land, water, air, and food. (*Adapted from CSWE Commission for Diversity and Social and Economic Justice and Commission on Global Social Work Education Committee on Environmental Justice, 2015*).

Holistic competence

The demonstration of competence is informed by knowledge, values, skills, and cognitive and affective processes that include the social worker's critical thinking, affective reactions, and exercise of judgment in regard to unique practice situations.

Intersectionality

A paradigm for understanding social identities and the ways in which the breadth of human experiences are shaped by social structures.

Multidimensional assessment methods

Multidimensional assessment methods capture behaviors indicative of competence as well as one or more of the factors underlying behavior. Underlying factors may include knowledge, skills, and values as well as cognitive and affective processes.

Program options

Various structured pathways to degree completion by which social work programs are delivered including specific methods and locations such as on campus, off campus, and virtual instruction.

Signature pedagogy

Forms and styles of teaching and instruction that are central to a specific discipline, area of study or profession that help students build a habit of mind that allows them to think and act in the same manner as experts in the field. Field education is the signature pedagogy for social work.

Specialized practice

Specialized practice builds on generalist practice by adapting and extending the nine social work competencies for practice. Specialized practice is defined by programs and can be operationalized by programs as a concentration, area of specialized practice, track, focus on specific populations, problem area, method of intervention, or approach to practice.

Student learning outcomes

The stated behaviors, knowledge, values, skills, and cognitive and affective processes that students are expected to demonstrate as a result of engagement in the explicit and implicit curriculum.

Accreditation Standards Terms

The following definitions were developed for use in the context of the 2015 accreditation standards (AS):

Curriculum (AS B2.0.2, M2.0.2, 3.3.2)

All planned educational experiences under the direction of the social work program that facilitates student attainment of competencies. Social work curricula includes supervised field education learning experiences.

Full-time equivalent faculty-to-student ratio (AS 3.2.3)

Refers to the institution's calculation of full-time faculty workloads. Programs should calculate faculty ratios that include adjunct and part-time faculty (not field instructors at field settings) in the full time equivalency description. Programs should include part-time students in this calculation.

Goals (AS B2.0.1, M2.0.1):

General aims of the program that are consistent with both the institution and program missions and reflect the values and priorities of the social work profession.

In-person contact (AS 2.2.4):

Refers to interpersonal interactions with clients and constituencies, and may include the use of digital technologies.

Matrix (AS B2.0.3, AS M2.0.3, AS M2.1.4):

A table or chart that maps the social work curriculum content to the competencies.

Multiple dimensions of each competency (AS 4.0.1)

- Multiple refers to a minimum of at least two dimensions.
- The dimensions of the competency are knowledge, values, skills, and cognitive and affective processes.

Post-social work degree practice experience (AS B2.2.9, M2.2.9, 3.2.2, B3.3.5 (b), M3.3.5 (b))

- The minimum requirement of 2 years of post-baccalaureate or post-master's social work practice experience is calculated in relation to the total number of hours of full-time and equivalent professional practice experience.
- Social work practice experience is defined as providing social work services to individuals, families, groups, organizations, or communities.
- Social work services can include work in professional social work auspices under the supervision of professional social work supervisors, volunteer practice experience in a social service agency and paid experience as a consultant in the areas of the individual's practice expertise.

Simulated practice situations (AS 4.0.1):

Modalities that replicate practice situations to facilitate the demonstration of student competence.

Transfer of credits (AS 3.1.4)

The process of awarding student credit for courses earned at another institution(s) prior to admission to the social work program. The accreditation process respects the institution's policies and procedures concerning the transfer of credits.
